

Prospect to Macarthur (ProMac)

Delivering our water future

Sydney Water is delivering a transformative investment in our city to ensure our water, wastewater and stormwater systems meet the needs of our customers now and in the future.

Our infrastructure delivery is timed to support the NSW Government's growth ambitions and is aligned with housing supply policy. New infrastructure, amplifications and upgrades will ensure the resilience and reliability of our water supply for generations to come.

The expansive program of work is being delivered across Greater Sydney, including the Blue Mountains and the Illawarra. A significant number of projects are currently in planning, while many are in delivery or have been completed.

Explore the [Major Projects Pipeline](#).

Water plays a key part in building sustainable, liveable communities, and Sydney Water is planning and delivering new water and wastewater infrastructure to enable the city's new facilities, communities and precincts to grow and thrive.

Based on anticipated growth and providing a resilient and reliable water supply to South West Sydney, Sydney Water prioritised the Prospect South to Macarthur (ProMac) project: 19 packages of work including three major pump stations, 22 km trunk mains, four new reservoirs, four rechlorination plants, civil works, stabilisation works, and decommissioning and demolition of an existing station and reservoir.

Investment in the Prospect South and Macarthur water delivery systems will service new growth areas in Western Sydney including 84,000 new dwellings and 62,000 new jobs in the near term.

Of the 19 packages, 17 packages are now complete and the remaining two will be delivered by the end of 2024.

This \$450 million project will safeguard our growing cities, build resilience into our water networks and minimise the impact of a changing climate.

Benefits for our customers and communities

Efficient and cost-effective wastewater services

Supporting 62,000 new jobs

Servicing approx. 84,000 new homes

3 major pump stations
22 km trunk mains
4 new reservoirs
4 rechlorination plants

Investment

\$450m

Construction due for completion end 2024. 2x24ML reservoirs servicing Oran Park, Harrington Park, Mount Annan, Narellan and surrounding areas.

Location

Investment in the Prospect South and Macarthur water delivery systems will service new growth areas in Western Sydney.
